

## **NOTICE TO ALL LABS**

CAEAL policy requires a minimum of 20 participants (in absence of a precision function) in order to continue to offer PT samples for any given parameter or test group.

The new test group C-30 (NTA) currently has only 10 labs participating. If we are unable to attract 10 additional participants, we will be required to remove this test group from the PT Program. We therefore appeal to all member labs to voluntarily register for this test group and to encourage other labs to register.

NTA will continue to be offered in the June 2003 study, as this will be the second “pilot” study for this new test group, however this may be the final study if we fail to attract more participants.

Should you wish to register for C-30 (NTA) please apply following normal registration procedures. A copy of the Application Form is available on the CAEAL web site ([www.caeal.ca](http://www.caeal.ca)).
